

Empfohlene Literatur, Werkstoffmechanik

- J. Lemaitre, J.-L. Chaboche: Mechanics of Solid Materials, Cambridge University Press, 1994
- K. Naumenko, H. Altenbach: Modeling high temperature materials behavior for structural analysis. Part I: Continuum mechanics foundations and constitutive models, Springer, 2016
<http://link.springer.com/book/10.1007%2F978-3-319-31629-1>
- J. Rösler, H. Harders, M. Bäker: Mechanisches Verhalten der Werkstoffe, Springer, 2016
<http://link.springer.com/book/10.1007%2F978-3-658-13795-3>
- R.W. Hertzberg: Deformation and Fracture of Engineering Materials, John Wiley & Sons, 1989

Empfohlene Literatur, Bruchmechanik

- D. Gross, Th. Seelig: Bruchmechanik, Springer, 2016
<http://link.springer.com/book/10.1007%2F978-3-662-46737-4>
- D. François, A. Pineau, A. Zaoui : Mechanical Behaviour of Materials. Volume II: Fracture Mechanics and Damage, Springer, 2013
<http://link.springer.com/book/10.1007%2F978-94-007-4930-6>
- M. Kuna: Finite Elements in Fracture Mechanics, Springer, 2013
<http://link.springer.com/book/10.1007%2F978-94-007-6680-8>

Empfohlene Literatur, Tensorrechnung

- K. Naumenko, H. Altenbach: Modeling high temperature materials behavior for structural analysis. Part I: Continuum mechanics foundations and constitutive models Springer, 2016
